A UTC Fire & Security Company

World leader in flame and fire detection instruments and systems featuring EQP Control systems that comply with all current regulations

TOTAL CEM SOLUTIONS INCLUDING DARS

•General purpose gas analyzers for industry •CEMS for compliance monitoring

Thermal Mass Flow instruments for flow monitoring including stack gas applications

Contec Systems

40 CFR PART 60
 40CFR PART 75(EDR2.2)
 NOxBUDGET
 40CFR PARTS 266 & 503

Data Acquisition Software for Continuous Emission Monitoring Systems

Automatic tank gauging and leak detection systems

Leakwise
 Oil-on-Water Detection and Monitoring Systems

LEAKWISE® Oil on Water Monitoring Systems

Sensors, pumps and controllers for the water treatment industry

including Web based solutions

LEL and toxic gas detectors

Full line of wet analytical products for industrial and environmental treatment systems

Variable Frequency drives and soft starters for the water industry

Premium process pumps, chemical injection packages, and components for industrial applications

Flow measuring instruments making use of several technologies to handle liquid, gas, and

steam applications in line sizes from 1/16" to over 100".

Meriam - Trusted Leader in Measurement and Calibration Solutions.

**Compressed Air Dryers and Filters
 Products for Clean Dry Compressed Air**

Our service partner providing complete design, build and installations services
